## Deskripsi Produk

Whether for office use or for enjoying entertainment at home, VX3211-4K-mhd is designed to take your viewing experience to another level. VX3211-4K's Ultra HD resolution is 4X higher than Full HD, which maximizes efficiency and image detail due to increased coverage areas. VX3211-4K-mhd's wide colour gamut achieves 95% of NTSC colour size, meaning it can deliver more shades of viewable colours. AMD FreeSync™ virtually eliminates screen tearing and stuttering for a fluid gaming experience. A mega dynamic contrast ratio of 80M:1 gives images more depth and the user experience is enhanced in all facets of monitor usage. Built in Picture-in-Picture (PIP) mode lets you combine more content at the same time to increase efficiency. Moreover, HDR 10 can display specific levels of colour and brightness that exceed standard monitors, while built-in HDMI inputs and DisplayPort can support a wide range of devices to offer flexibility for your connection needs.

\*This monitor is GeForce Driver G-Sync Enable-Ready [\[Disclaimer\]](#).
